

PHOENIX® FLEX LED *docklite*® is a registered trademark of PHOENIX

- ▶ Energy efficient - operates on 16W
- ▶ Uses 84% less energy than 150W models
- ▶ Provides light comparable to an incandescent 150W PAR38 lamp
- ▶ Long-life LEDs (rated 50,000 hours) deliver bright, uniform, instant-on light
- ▶ Easy installation mounting bracket compatible with most dock light mounting hardware
- ▶ Flexible arm offers great flexibility in positioning
- ▶ High-temperature polymer housing resists denting and wear
- ▶ Vented housing help maintain LED longevity
- ▶ With no filament to break, solid state lighting proves far more durable than incandescent sources
- ▶ Polycarbonate available for food applications at not extra charge

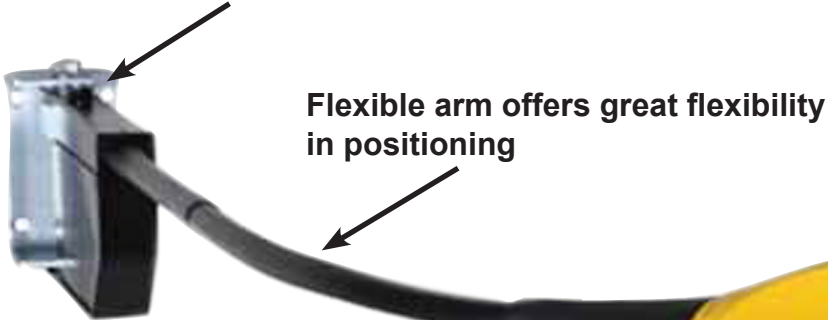

PHOENIX FLEX LED DOCKLITE®

LIGHTING & COMMUNICATION

ORDERING INFORMATION

SERIES	TYPE	LAMP
DLP	FLEX	LED
DLP	FLEX	LED

Easy installation mounting bracket compatible with most dock light mounting hardware

Flexible arm offers great flexibility in positioning

Long-life LEDs (rated 50,000 hours) deliver bright, uniform, instant-on light

High-temperature polymer housing resists denting and wear

Vented housing to help maintain LED longevity

Provides light comparable to an incandescent 150W PAR38 lamp

With no filament to break, solid state lighting proves far more durable than incandescent sources

ENERGY EFFICIENT OPERATES ON 16W
Uses 84% less energy than 150W models!
